Supply Management Training: Logistics

TUESDAY EVENINGS FROM JANUARY 9 - APRIL 10, 2018

INTRODUCTION & BACKGROUND

Supply Chain Management has been defined many ways by many different people and organizations. Essentially it boils down to ensuring that your customer needs are satisfied through the effective management of processes and activities, from the sourcing of materials and services, through the conversion/production phases, then finally to the customer through a distribution network.

The goal of this course is to have participants appreciate the big picture and recognize that through its evolution Supply Chain Management has driven significant value and competitive advantage to those organizations that expend efforts in their Supply Chain Management activities.

KEY LEARNING OBJECTIVES

- Describe a supply chain.
- Describe the importance of supply management, forecasting and inventory management.
- Describe the supply chain management planning process.
- Describe the role of transportation and warehousing.
- Describe how technology can support integrated supply chain processes.
- Access the potential impact of supply chain initiatives or shortcoming.

INSTRUCTOR PROFILE

Fred Hoffman

The Logistics Coordinator for Mitsubishi Hitachi Power Systems Canada Ltd. in Saskatoon and has been involved in the transportation, customs compliance and supply chain sector for over two decades. Fred has been an instructor with the Supply Chain Management Association (SCMA) since 2006 and teaches a number of the SCMA Diploma courses. He has sat on the Saskatchewan Board of Directors, SCMA and is a Past President & Membership - Education Director.
