What is the MSc in Finance?

The Master of Science in Finance (MSc in Finance) program is a two year, research based thesis program offered by the Edwards School of Business. This program was designed to give students the tools and experiences required for a strong career in either academia or industry.

The MSc in Finance provides students with a theoretical background in contemporary financial issues and incorporates a strong foundation in empirical methods.

Throughout the program, students have the opportunity to question and understand current financial literature and practices, engage with devoted and knowledgeable faculty and staff, and participate in various special guest lectures and presentations.

Be a financial master

Only a handful of universities across North America offer programs that have a similar focus on financial research at the Master’s level.

Dembroski Student Managed Portfolio Trust (SMPT)

The Dembroski SMPT is an experiential learning opportunity in which Edwards students get to work with equity markets in real time with real money. The stock portfolio is managed by students and offers practical financial investing experience.
